

BCAC Farm Estate Planning

(offered through STRATA Benefits and Daystar Financial)

Estate Planning is often delayed, and unfortunately sometimes delayed too late. It is a critical component for on-going success and growth of the business, and also to create fairness among family members.

Without a proper and tax-effective plan in place, problems may arise in significantly higher taxation, probate fees, and estate administration. This loss of estate value together with surviving family members feeling that the estate planning or lack of planning was not fair can cause serious family problems well into the future. It can also negatively affect the on-going success and growth of the business.

BCAC Members now have access through STRATA Benefits and Daystar Financial's Professional advisor teams in BC to assist in your planning needs for:

- Estate
- Succession
- Retirement and
- Tax Strategies

Their BC Team works with your accountant and lawyer to develop a customized plan to meet your personal and business objectives.
